SUMMARY

I am a skilled front end developer with a strong foundation in HTML, CSS and JavaScript. I can build visually appealing and interactive web and mobile applications that are user-friendly, responsive and functional ensuring clean and maintainable code. I am also proficient in Git and GitHub, which allows me to effectively collaborate on projects and professionally showcase my work.

EXPERIENCE

Frontend Developer | Bowen Tech Hub | Remote | October 2022 - September 2023

- Contributed to the development of the Bowen University NACOSS website as part of a collaborative team environment.
- Gained valuable teamwork experience while working on the project.
- Working on the project provided a valuable opportunity for me to learn and grow while working collaboratively.

PROJECTS

Javascript Tip Calculator ([Live Demo](#) | [Source Code](#))

- Built a Javascript tip calculator
- Users can calculate tips based on a bill amount.
- Technologies used: Html, Css, Javascript, Git, Vercel.

Iphone Calculator ([Live Demo](#) | [Source Code](#))

- Cloned the Iphone calculator design and added Js functionality.
- Users can perform basic arithmetic operations and display the result.
